

07-10-1985-p.3

8:45 P.M. — intense thunder storm approaching from the NW — the strongest wind I have experienced here yet and very very menacing clouds — rapidly enveloping the entire area. Rain not very heavy, which is unfortunate, because we need rain here. The storm passed in about 15 minutes and only left a small quantity of rain in its wake.

I believe that I will have the revised copy of P.N.... put on microfiche cards and not on microfilm — Micrographics now has a new fiche machine that can put 270 — $8\frac{1}{2} \times 11$ pages on one 105 mm \times 148 mm (4" \times 6", approximately) microfiche card. That is truly astounding. When I pick up the bundle of materials at Micrographics that I have there now (I will do so next week some time), I will drop off the Revised Edition of P.N.... for microfilming. When I do so, I will breathe easy once again — thousands of additions and corrections have been made to the original P.N.... and they must be recorded on microfilm/microfiche cards.

07-11-1985-p.1

Bright sun, breezy, cool —
the lily report:

light orange —	1	"	5	"	"	recurred, heavily spotted throats
dark orange —	1	"	4	"	"	lightly spotted throats
	1	"	1	"	"	"
red orange —	1	"	3	"	"	"
	1	"	1	"	"	"
lemon yellow —	1	"	2	"	"	very lightly spotted throats
Chinese red —	1	"	3	"	slightly recurved	lightly spotted throats
dark red —	1	"	6	"	"	"
dark red —	1	"	6	"	recurved	very lightly spotted throats

Last night before going to bed, I took out P.N.... 1985 and wrote the "Notice" which is given on page one of the microfilm copy on microfiche cards ("Preparatory Notes.... 1985 By S. Robert Powell"). Having done so, I was very anxious — more anxious than usual — to get the typescript/manuscript to Micrographics. Not surprisingly, C. Martin at about 11 A.M. decided to go into town to the BBC and type up the "Notice" and then take P.N.... 1985 down to Micrographics & have it put on microfiche cards. At 4 P.M. I was on my way back to Carbondale from Hazelton,
